Loi

Letter of Intent - HYPAR

Company: Anticloud FZ LLE
Model: PAX L5 Narrow L2 General 27B
Project: HYPAR Category: ARCHITECTURAL_DESIGN
Upstream: https://github.com/hypar-io/hypar-elements (MIT)

1. Intent

The undersigned expresses non-binding intent to evaluate a pilot deployment of the Anticloud FZ LLE offline package for HYPAR (Generative architecture framework), including PAX L5 Narrow L2 General 27B inference, AIOSS audit wiring, and single-binary installation.

2. Scope of Evaluation

- Offline functionality test (no network egress)
- AIOSS chain verification (hash replay from genesis)
- Benchmark review (MITRE ATT&CK; 100/100, NIST AI RMF 88%, TRL 7/9, ISO 27001 83%, EU AI Act 77.4%; Kaggle v52: 4.1-4.2 tok/s single T4, 20/20 coherent, chain head 2828cffabd1d063a)
- Documentation review (10_TECHNICAL_HANDOFF, 28_TECHNICAL_WHITEPAPER, OFFICIAL_BENCHMARKS)

3. Structure

Non-dilutive preferred instrument; pilot pricing per 07_ENTERPRISE_LICENSE_AND_PRICING; white-labelling per 06_WHITELABELLING_AND_REPACKAGING. Definitive agreements to follow diligence.

4. Confidentiality & IP

Upstream remains MIT; Anticloud integration layer under Anticommons 0.1.0 / enterprise license. Mutual NDA on request.

5. Contact
